The State Teachers College at Milwaukee is ideally located for a summer school. A cool and invigorating climate, beautiful surroundings, a wide variety of cultural and inspirational opportunities, combined with excellent educational facilities and a broad program of professional and cultural courses make it an ideal place for study and recreation.

The College is located on Milwaukee's East Side, famous for its shore line, its inviting parks, its interesting drives, and its beautiful homes. On account of the cooling influence of Lake Michigan, there is seldom a day in mid-summer that is too hot for sustained study. In this environment the student will find those influences that rest the tired body and restore the drained spirit.

The City of Milwaukee is located in the midst of Wisconsin's playgrounds. Luxurious lake steamers invite to week-end trips to Chicago, the west shore of Michigan, or to Door peninsula. The Land O'Lakes, beautiful Lake Geneva, and the resorts of a half dozen other lakes are only a few hours distant by bus or trolly. The city of Madison and the Dells of the Wisconsin River may be visited on a one-day bus or motor trip.

Nearer at hand are all the artistic and educational advantages of a large city: a wide variety of industries, the museum with its historical and scientific collections, art galleries with their master-

pieces of sculpture and painting, the public library with its great collection of books, concerts and recitals affording the best in music, churches and cathedrals, parks inviting to rest and recreation—all welcome the student to the best they have.

To these surroundings and opportunities the College invites you to come and take advantage of its interesting and varied program of work and recreation. The educational program includes a wide variety of cultural and professional courses, chosen with careful regard to your interests and needs. To our regular staff of instructors there has been added a large number of the ablest teachers that could be secured from other colleges and universities. Men and women of national and international reputation have been engaged to address the regular assemblies.

The program of recreation includes excursions, dances, beach parties, tennis and golf tournaments, swimming, and the traditional boat trip.

Confident that you who are teachers and prospective teachers will find in our program something that will meet all your needs, we invite you to examine this preliminary announcement. A complete announcement will be sent on request. For further information, address The Director of the Summer School, State Teachers College, Milwaukee, Wisconsin.

3 0112 062240301

GENERAL INFORMATION

ADMISSION. Teachers in service will be admitted without examination, and allowed to pursue such courses as they are qualified to carry.

Students working toward a diploma or a degree at this institution must comply with the entrance requirements. Students taking work to transfer to some other school need not comply with these requirements.

REGISTRATION. Registration takes place on Saturday, June 22. Classes begin on Monday, June 24th. June 29 at noon is the last date of registration for credit.

Credit. Resident credit toward diploma and degree is given for work satisfactorily completed in the courses of the Summer Session, in the same ratio as for work done during regular year.

CREDITS TOWARDS COUNTY CERTIFICATES. County superintendents are authorized to accept credit for courses carried in the normal school (in lieu of examination) in the subjects required for professional and provisional certificates.

CREDIT AT OTHER HIGHER INSTITUTIONS OF LEARNING. The State Teachers College is an "Accredited Higher Institution" in the North Central Association of Colleges and Secondary Schools.

DEGREES. The college offers the degree of Bachelor of Education to students who complete the requirements of the four year curriculum, majoring in any of the following fields: Kindergarten-Primary Education; Elementary Education; Elementary Supervision and Administration; Secondary Education; Art Education; Music Education.

Students of Deaf and Rural Education may complete requirements for the degree in Elementary Education.

FEES. Tuition will be free to all teachers and prospective teachers who are residents of the State of Wisconsin. Each student pays an incidental fee of $7.00 covering the cost of registration and text books, and a social and athletic fee of $2.00, which is used to provide special instruction, concerts, entertainments, special lectures, dances, etc. Students who are not residents of the State of Wisconsin are required to pay a tuition fee of $15.00.

FACILITIES FOR PRACTICE TEACHING AND OBSERVATION. The Campus Training School is maintained during the summer session largely for demonstration and observation purposes. Here the visiting teacher may see an excellent example of the child centered school. Those interested in activity curricula may observe a school whose work, from the nursery through the kindergarten and the eight grades of the elementary school, consists entirely of interest directed activities.

Training centers will be in operation in cooperating high schols, in cooperating parochial schools, in an ungraded class for the deaf, and in a one-room rural school.

ENTERTAINMENTS AND LECTURES. While the State Teachers College is primarily a professional school, it believes that every teacher should be first of all, a liberally educated person. In addition to the regular program of liberal studies the college will offer, during the summer school, a wide variety of lectures, concerts, and recitals by speakers and artists of national and international reputation.

Social Life and Recreation. The Summer School offers a well organized program of social life and recreation, which includes excursions to the many points of interest and beauty, dances, beach parties, tennis and golf tournaments, swimming, boat trips on Lake Michigan, etc.
